QuickStream

Quick Start Guide

A simple guide to taking payments, finding transactions and accessing reports in QuickTerminal.

WHAT IS QUICKTERMINAL?

QuickTerminal is QuickStream's secure online portal for authorised users to take payments, manage transactions and access reports. VN1

THINGS YOU SHOULD KNOW

- ✓ Confirm you are using the correct merchant or biller profile.
- ✓ Review payment details carefully before submitting.
- ✓ Check the customer reference against your internal records.
- ✓ Only submit payments where you have the required authority.

Available functionality depends on your organisation's Westpac setup, payment options and user access.

Screens and workflows may change as QuickTerminal is enhanced. If your organisation has a bespoke setup, also refer to your Westpac onboarding material.

SUPPORTED PAYMENT TYPES

Payment types available in QuickTerminal depend on your organisation's configuration.

CREDIT CARD

Take credit card payments where enabled.

BANK ACCOUNT

Take direct debit payments from bank accounts where enabled.

PAYTO

Create one-off PayTo payments where enabled.

Only payment options provisioned for your organisation and assigned to your user profile will be visible.

QUICK START

Use this guide to quickly find the task you need.

Make a credit card payment 3

Make a bank account payment 5

Make a PayTo payment 7

Find transactions 9

Refund or void a transaction 11

Export transactions 14

View daily settlements 15

View weekly settlements 16

View facility reports 17

1

Make a credit card payment

Capture a customer credit card payment in QuickTerminal.

Payment Details → **Confirm Payment Details** → **Transaction Details**

01 ENTER PAYMENT DETAILS

Select Transactions and Reports > Make a Payment > Credit Card. VN2

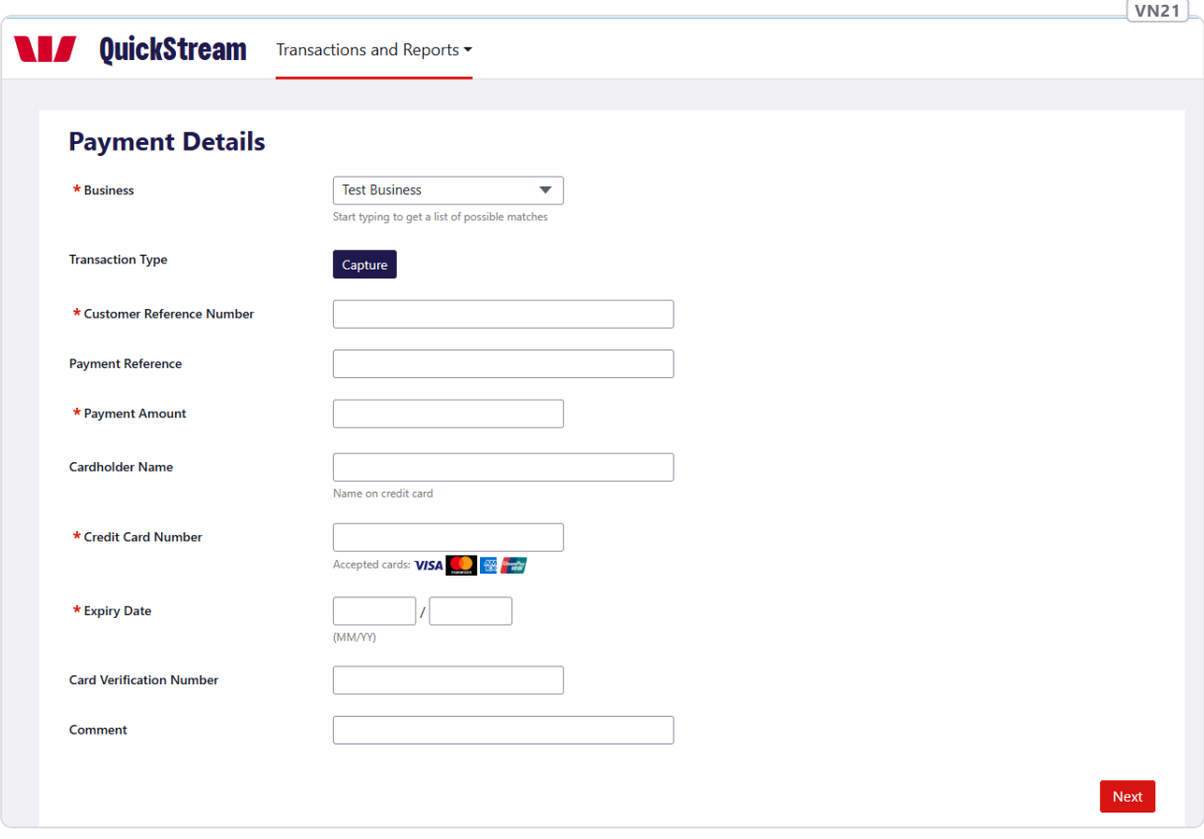

Complete the required payment and card details.

Select Next.

GOOD TO KNOW

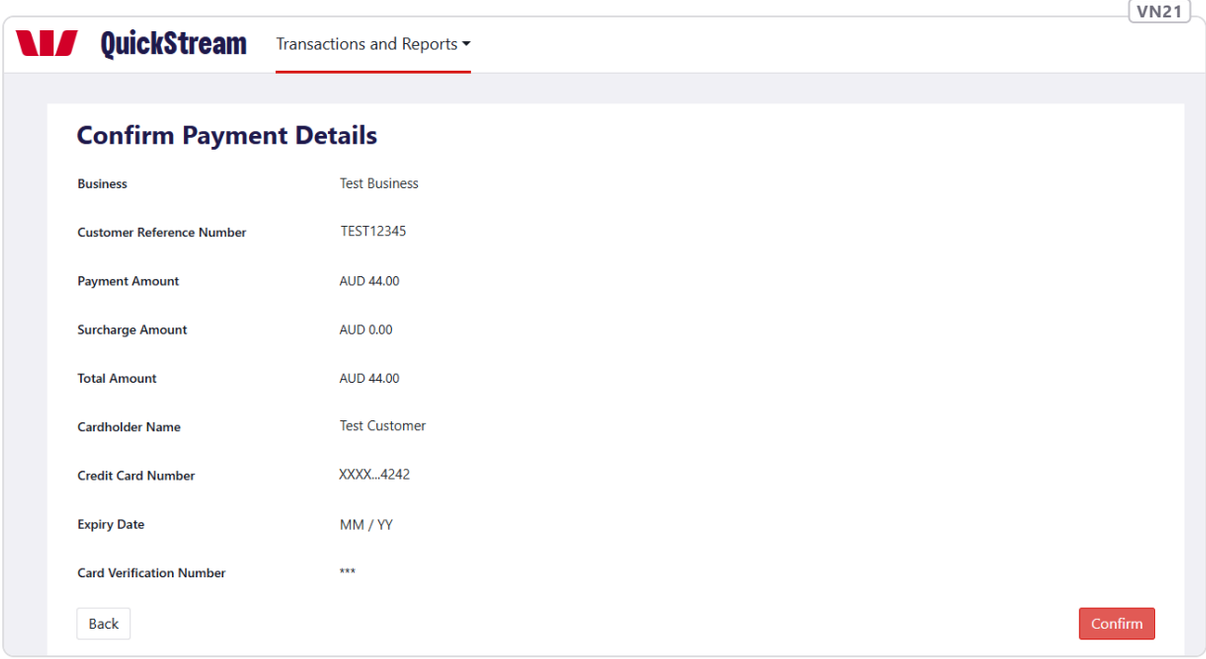

Check the customer reference and payment amount carefully before continuing.

VN21

02 REVIEW PAYMENT

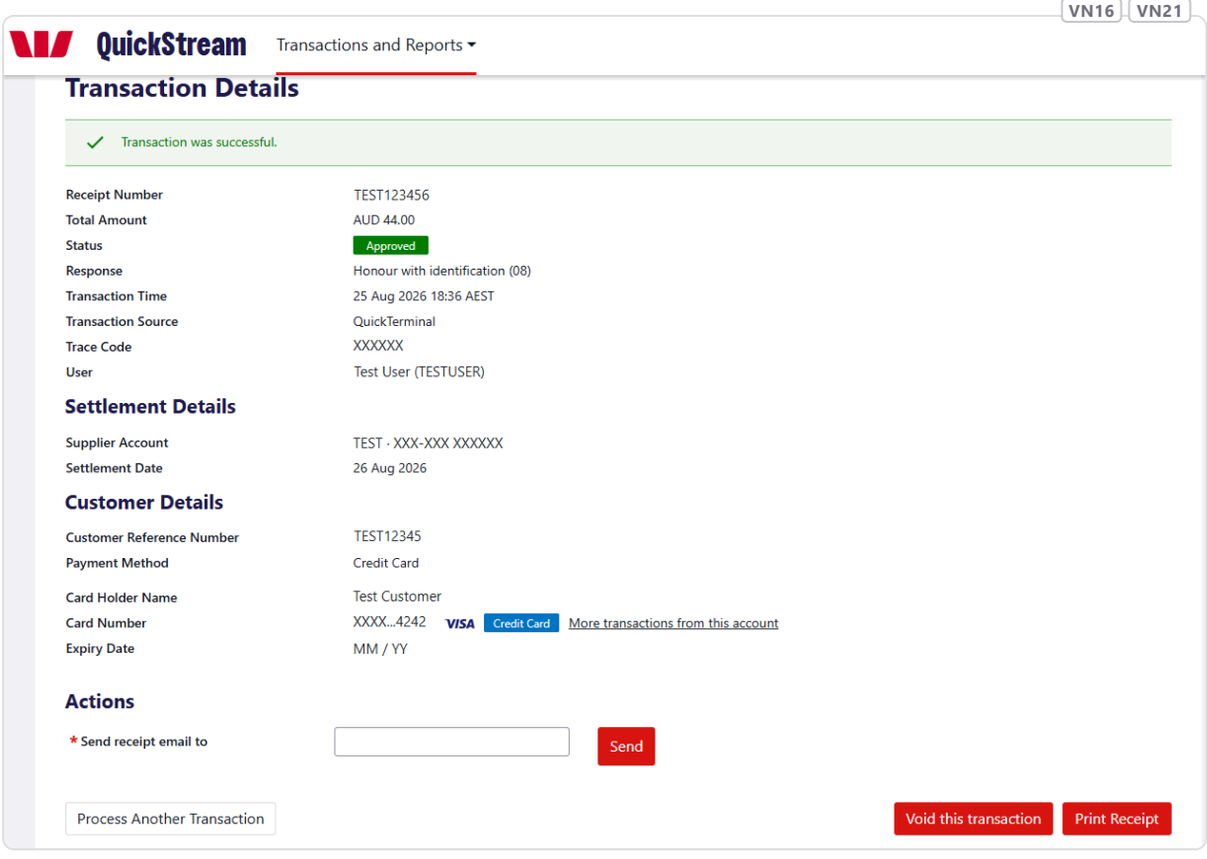

VN21

Review the business, customer reference, payment amount and card details. Select Back if anything needs changing. Select Confirm when the details are correct.

03 PAYMENT COMPLETE

VN16 VN21

Review the transaction status, response and receipt number. Where required, email or print the receipt, or select Process Another Transaction.

2

Make a bank account payment

Capture a direct debit payment from a customer's bank account.

Payment Details → **Confirm Payment Details** → **Transaction Details**

01 ENTER PAYMENT DETAILS

Select Transactions and Reports > Make a Payment > Bank Account. VN2

Enter the customer reference, payment amount, BSB, account number and account name.

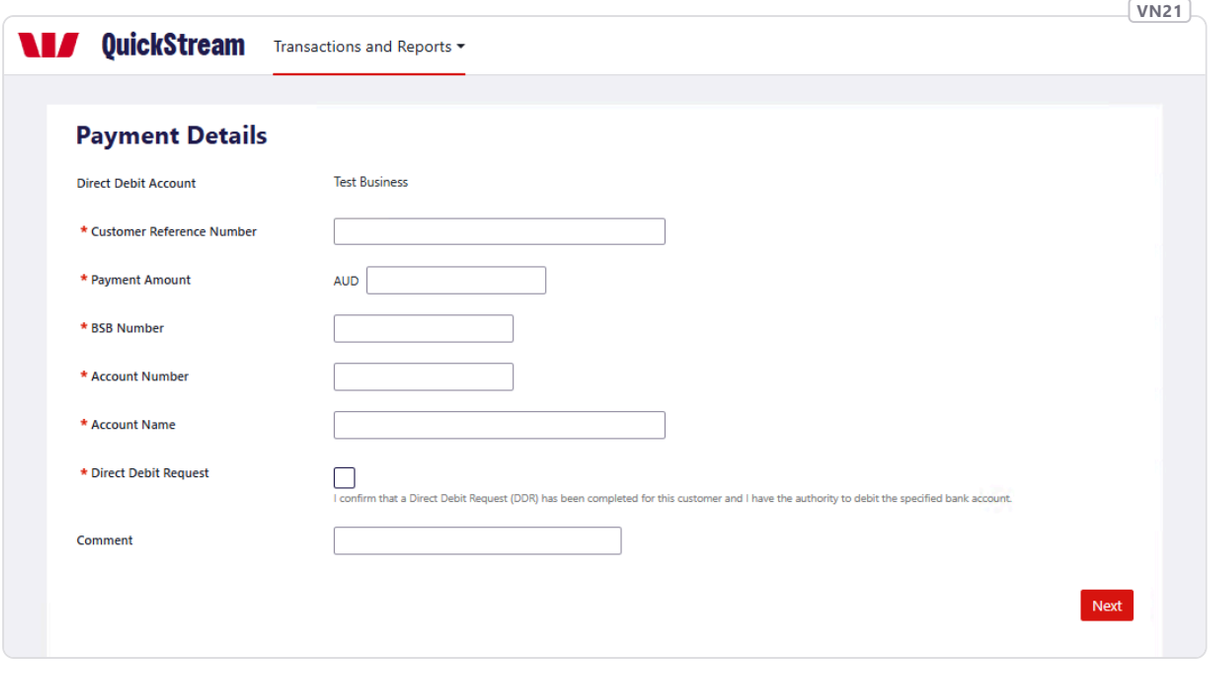

Tick the Direct Debit Request confirmation when the required authority has been completed.

Select Next.

GOOD TO KNOW

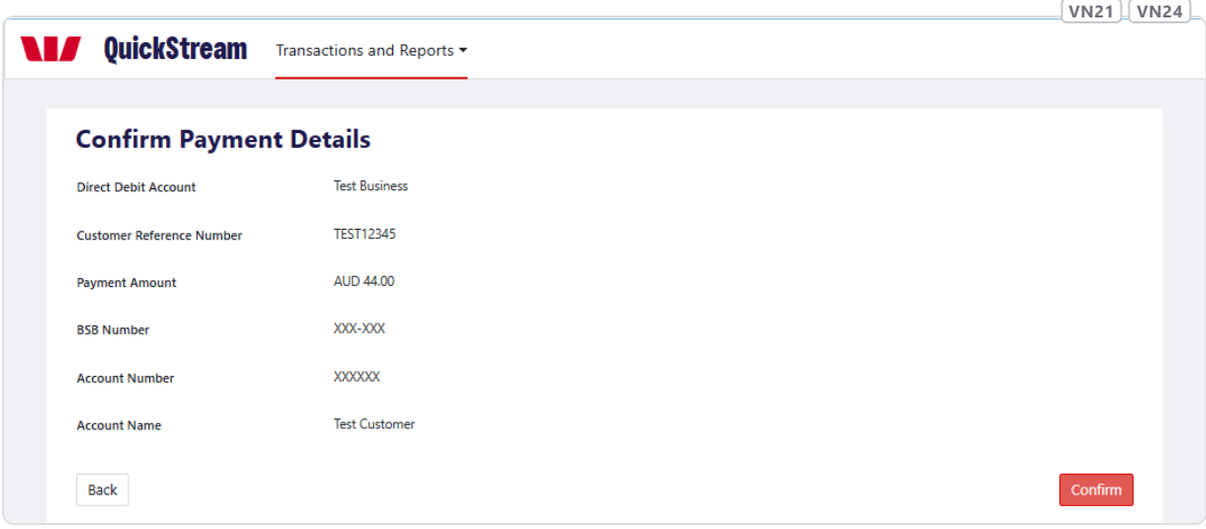

Check the customer reference, BSB and account number carefully before continuing.

VN21

02 REVIEW PAYMENT

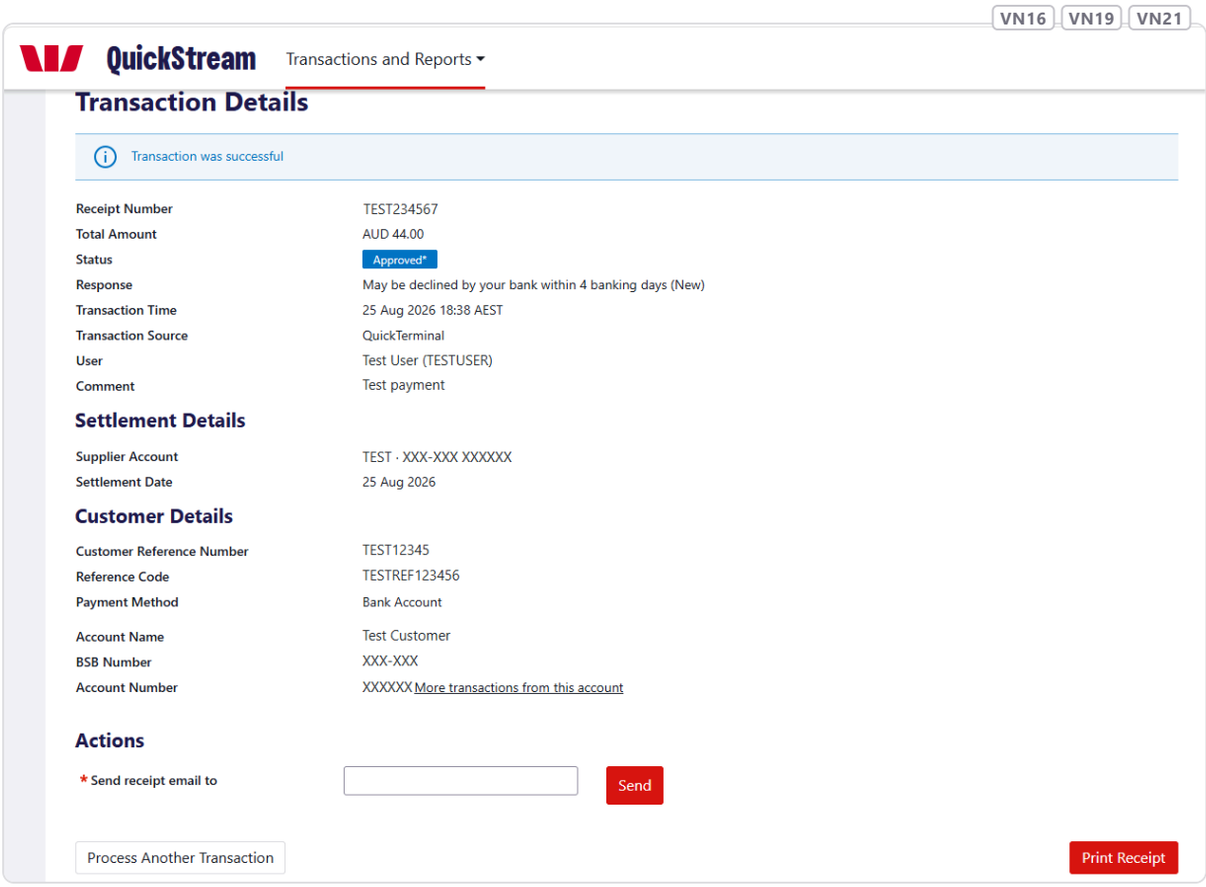

VN21 VN24

Review the direct debit account, customer reference, payment amount, BSB, account number and account name. Select Back if anything needs changing. Select Confirm when the details are correct.

03 PAYMENT COMPLETE

VN16 VN19 VN21

Review the transaction status, response and receipt number. Where required, email or print the receipt, or select Process Another Transaction.

Approval is only the first step. The customer's bank can still return the payment. Follow your organisation's reconciliation procedures to identify and handle bank returns. VN12

3

Make a PayTo payment

Create a one-off PayTo payment that the customer approves before it is attempted.

Available only if PayTo is enabled for your organisation and assigned to your user profile. VN10

01 ENTER PARTY DETAILS

Select Transactions and Reports > Make a Payment > PayTo.

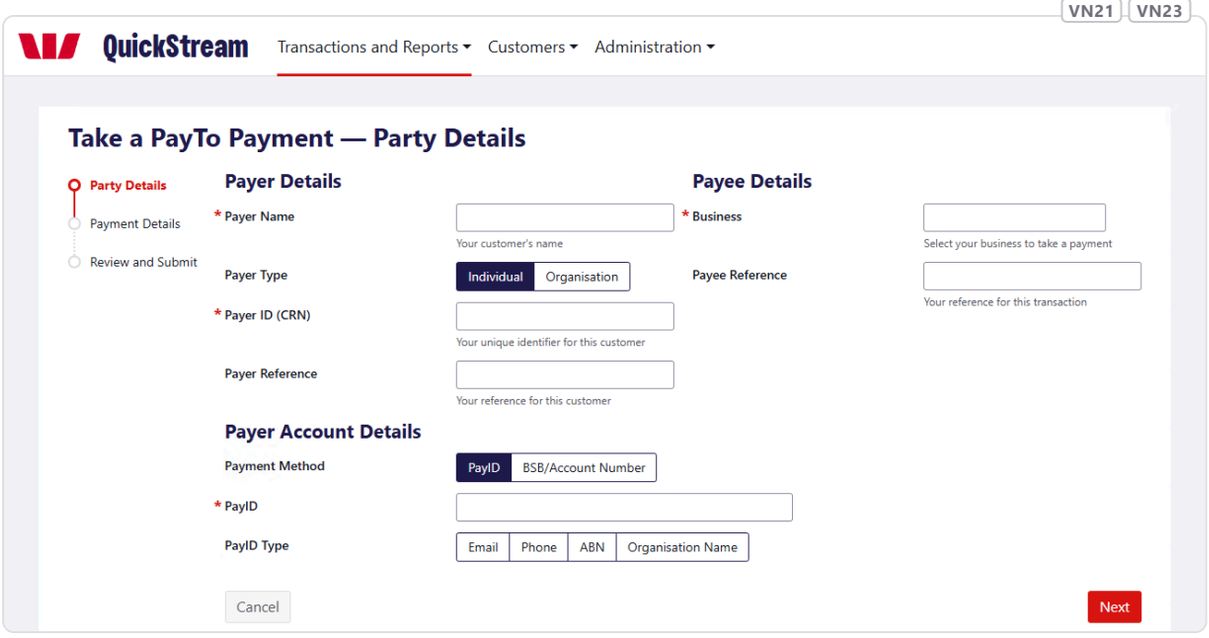

Payer Details: enter the Payer Name and Payer ID (CRN) and choose the Payer Type.

Payer Account Details: choose PayID or BSB/Account Number. For a PayID, enter it and choose its type. VN4

Payee Details: choose the Business.

Select Next.

VN21 VN23

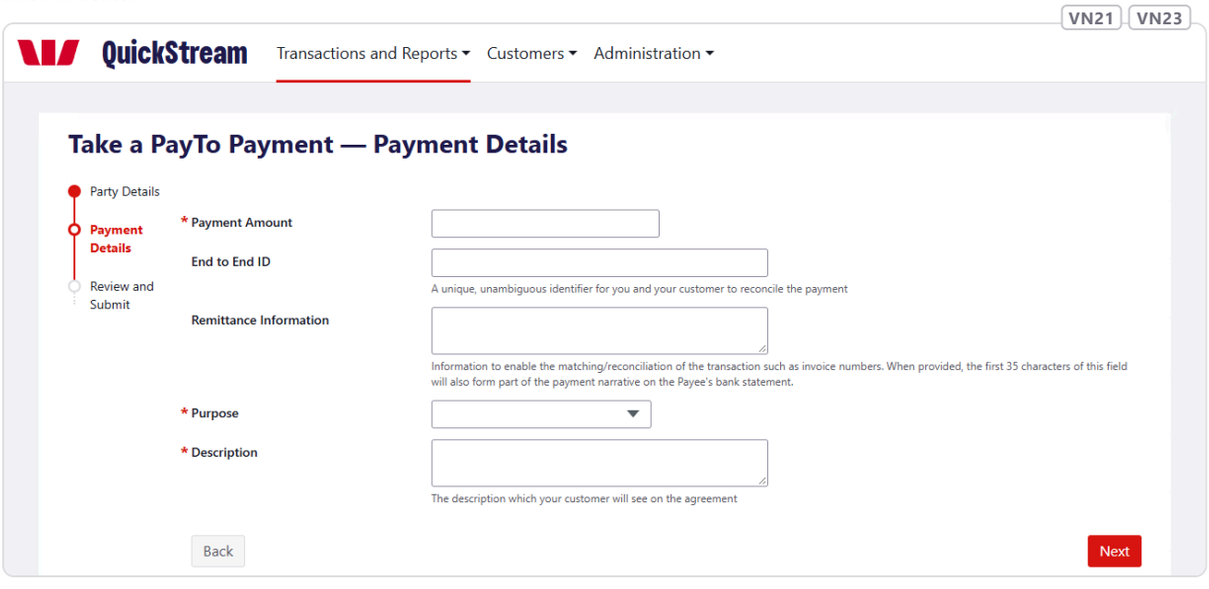

02 ENTER PAYMENT DETAILS

Enter the Payment Amount, choose the Purpose and enter a Description. The customer sees the Description on the agreement.

Select Next.

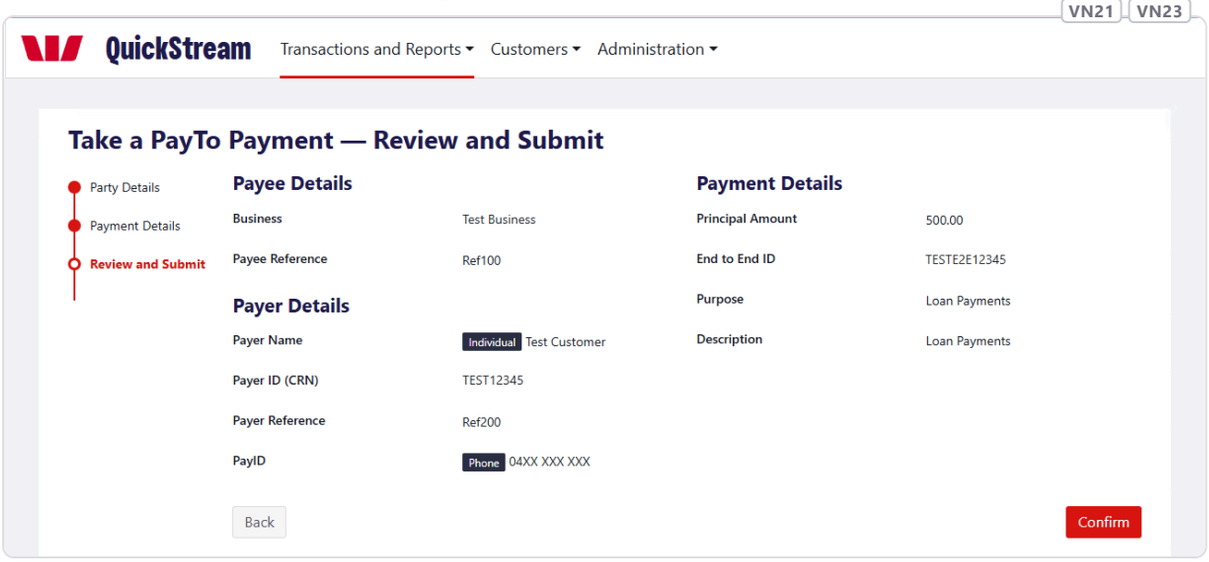

VN21 VN23

03 REVIEW AND SUBMIT

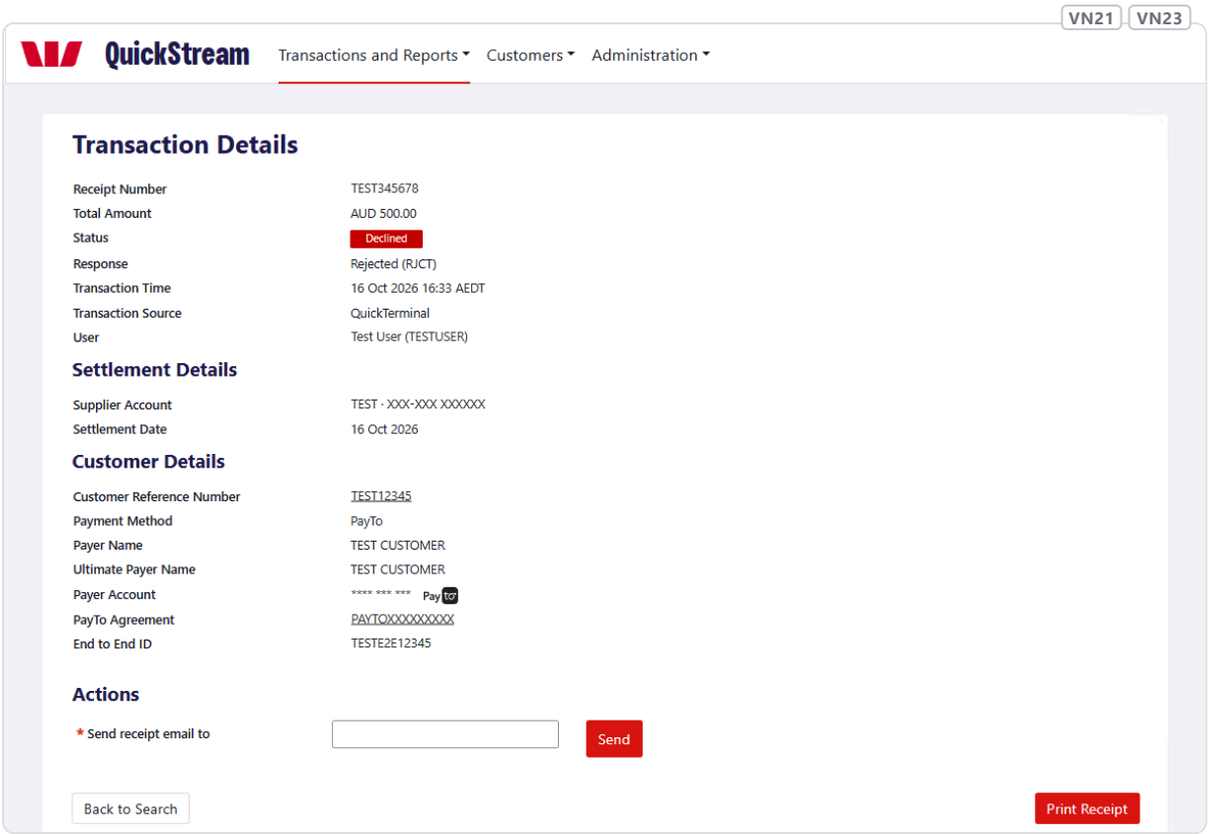

Check the details, then select Confirm. This creates a one-time PayTo agreement and sends it to the customer for approval in their banking app. VN5

VN21 VN23

04 CHECK THE PAYMENT STATUS

VN21 VN23

The Transaction Details screen shows the payment status and the response. The payment stays pending until the customer approves the PayTo agreement, then it is attempted. VN5 This example is a declined payment.

GOOD TO KNOW

Three things are separate: the customer's approval of the agreement, the payment status, and settlement. Approval only allows the payment to be attempted. Check the payment status before you tell the customer it is complete. Your settlement reports may show the payment once it settles. VN22

4

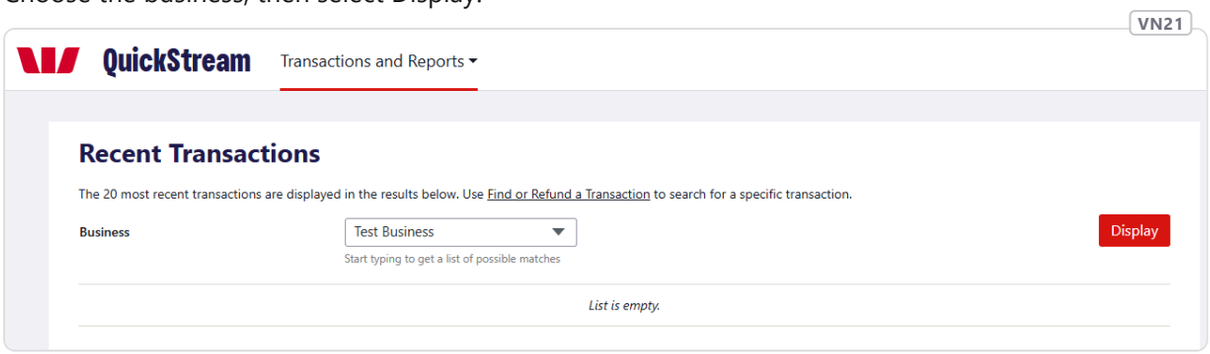

Find transactions

Look up recent activity, search for a transaction and open its details.

01 RECENT TRANSACTIONS

Select Transactions and Reports > Find Transactions > Recent Transactions.

Choose the business, then select Display.

QuickTerminal shows the 20 most recent transactions.

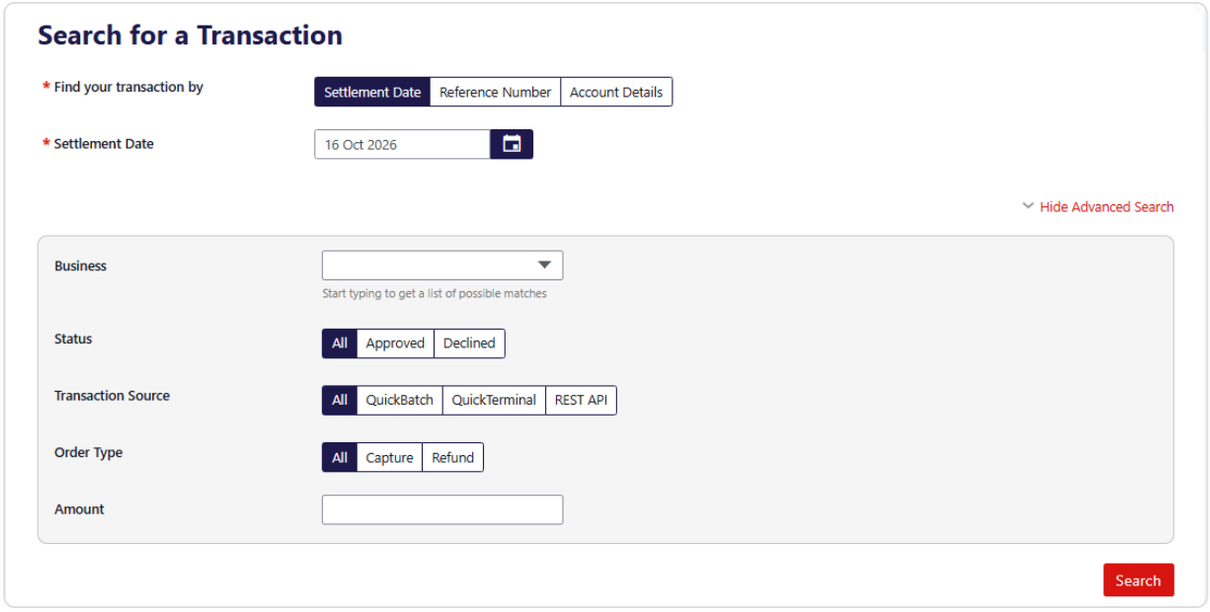

02 SEARCH FOR A TRANSACTION

Select Transactions and Reports > Find Transactions > Find or Refund a Transaction.

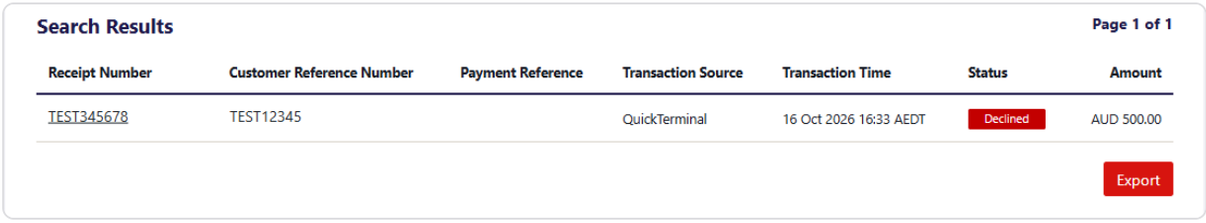

Choose how to search: Settlement Date, Reference Number or Account Details. Reference Number accepts a customer reference, payment reference or receipt number. Account Details accepts a full or partial card number, or a BSB and account number. VN11

Use Advanced Search to narrow the results by business, status, transaction source, order type or amount.

Select Search.

03 REVIEW THE RESULTS

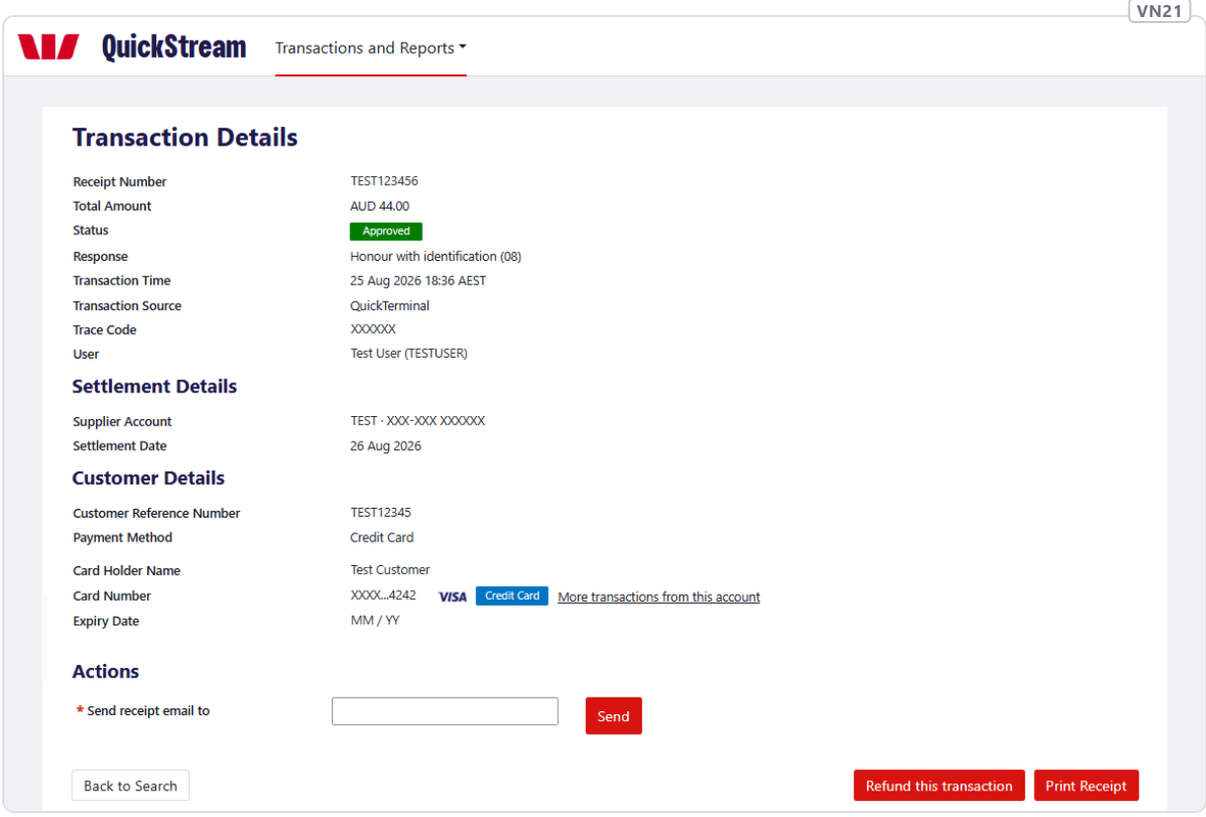

Results show the receipt number, customer reference number, payment reference, transaction source, transaction time, status and amount. Refunds appear as negative amounts. Hover over a status to see the response from the customer's bank. VN13

04 OPEN THE TRANSACTION DETAILS

Select the receipt number.

VN21

The Transaction Details screen shows the payment, settlement and customer details. Available actions depend on the transaction and your user permissions: VN10

- Send receipt email to — enter an email address and select Send.
- Print Receipt.
- Back to Search.
- Refund this transaction or Void this transaction, whichever is shown. See Refund or void a transaction.

5

Refund or void a transaction

Void and refund are different actions. Choose the one that applies to the transaction.

Refund and void options appear only when they are available for the transaction and allowed by your user permissions. VN10

VOID

Cancels an eligible transaction before it is included in settlement. VN9

- Card: before the bank cut-off time. VN9
- Bank account: before the payment is sent to the bank.

REFUND

Returns money to the payer as a separate transaction. It does not cancel the original payment. VN8

- Card: after the bank cut-off time.
- Bank account: 4 banking days after the original payment date. VN9
- PayTo: after the payment is approved. VN6

Which action is available depends on the transaction type and timing. Starting a refund does not mean the money has already reached the customer. VN8

01 FIND THE TRANSACTION

Select Transactions and Reports > Find Transactions > Find or Refund a Transaction.

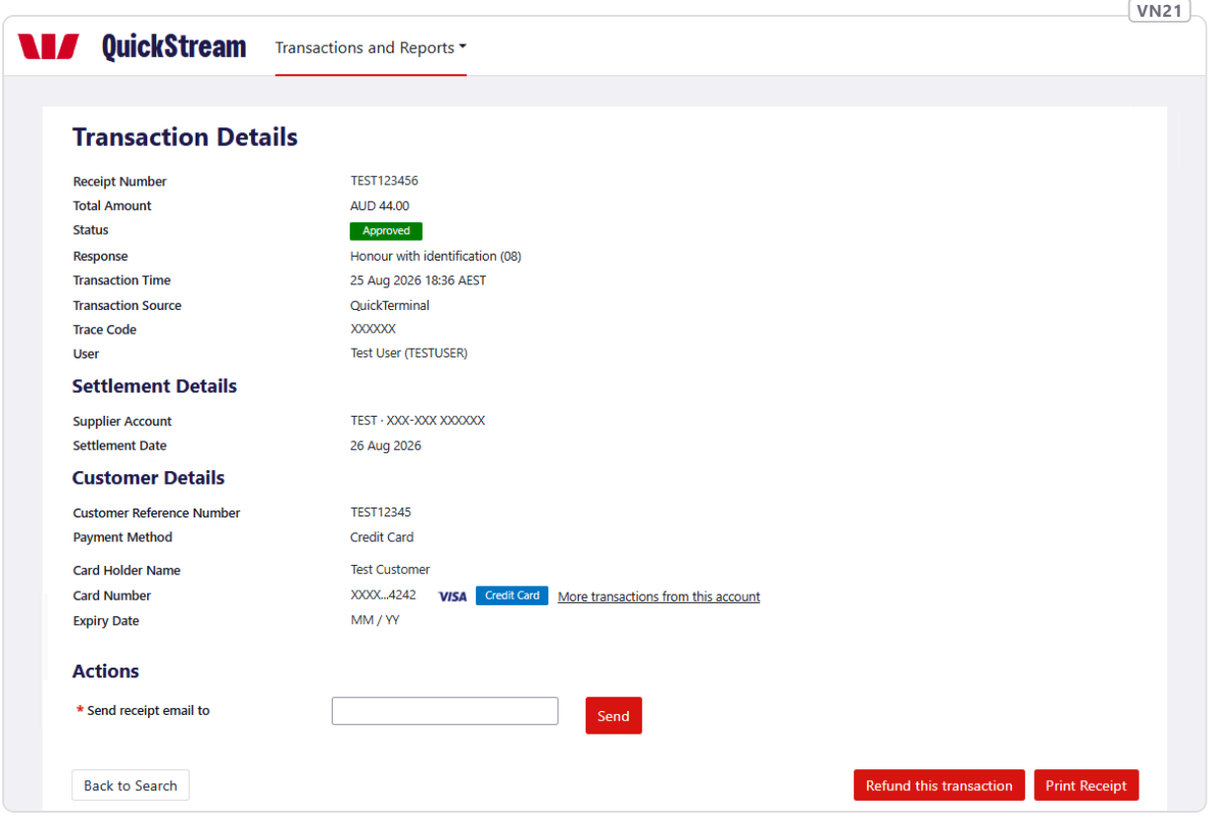

Search for the transaction. See Find transactions.

02 CHOOSE REFUND OR VOID

Select the receipt number to open the Transaction Details screen.

Select Refund this transaction or Void this transaction, whichever is shown. VN9

VN21

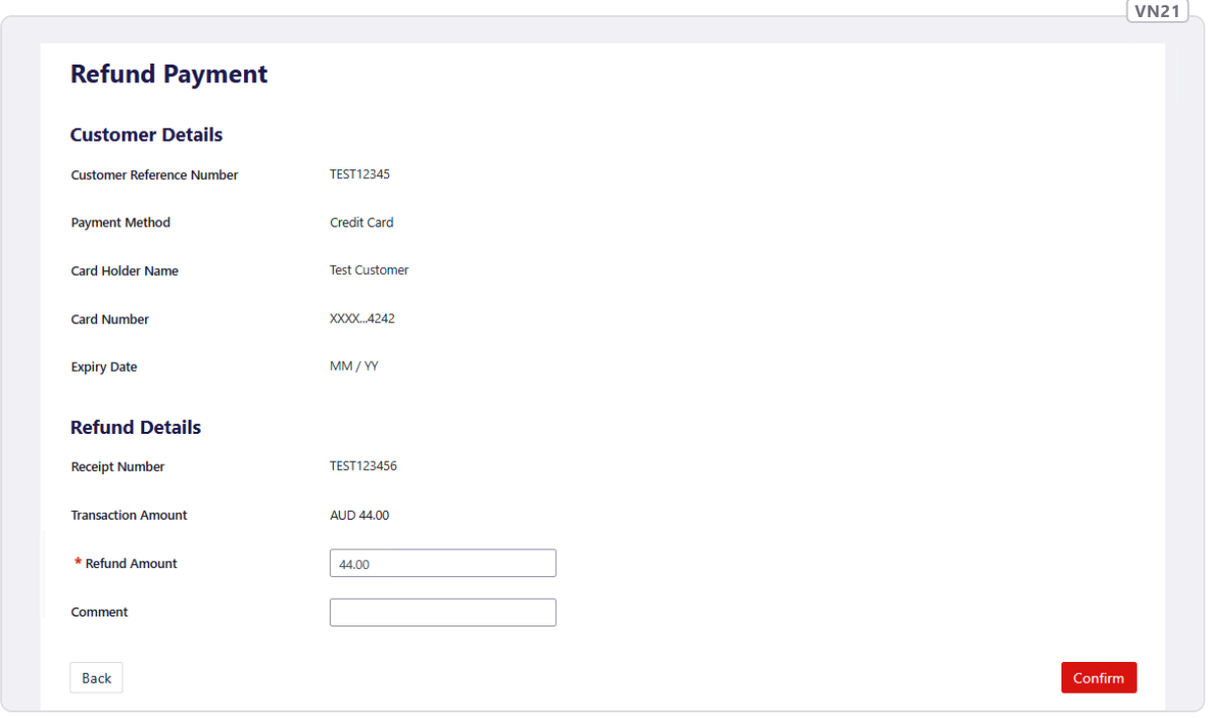

03 CONFIRM THE REFUND

On the Refund Payment screen, check the details and the Refund Amount, add a comment if needed, then select Confirm.

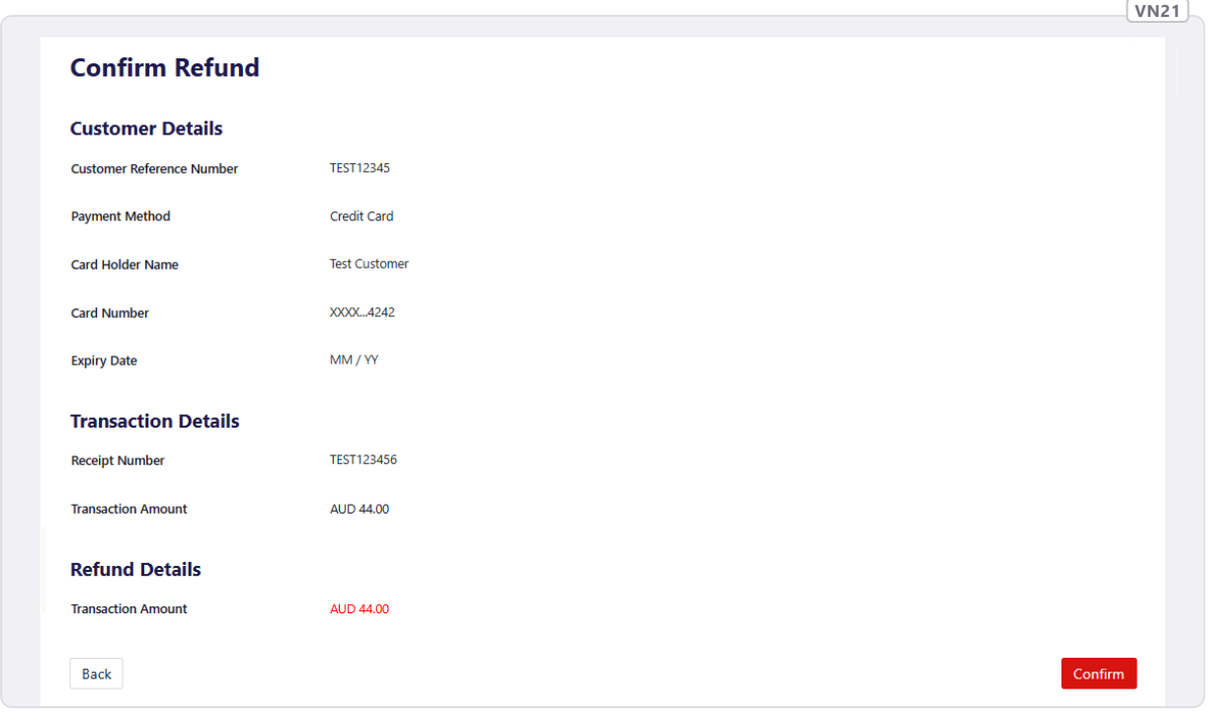

On the Confirm Refund screen, check the details and select Confirm again.

Void: follow the on-screen steps to confirm. VN7

VN21

VN21

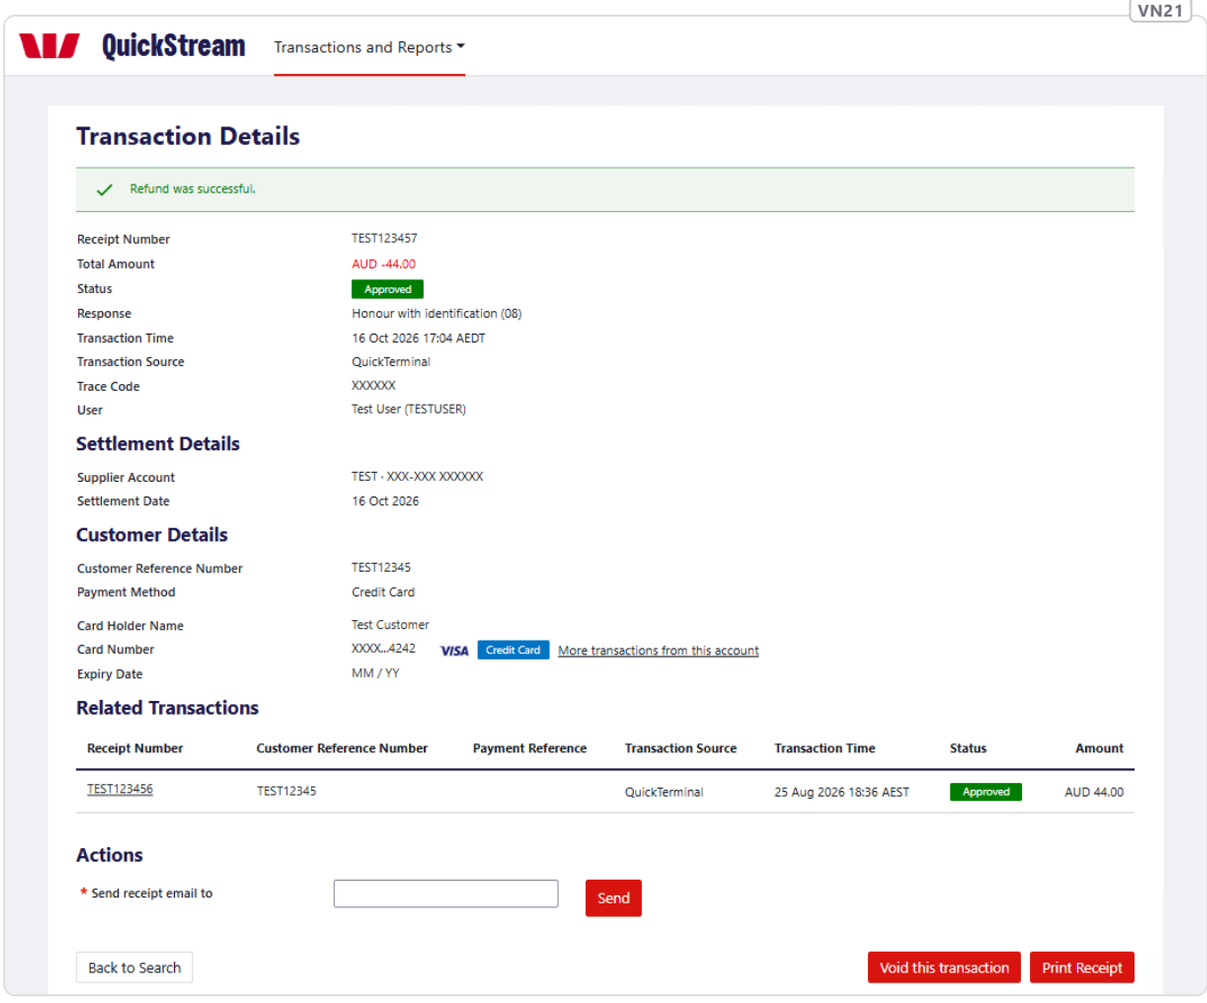

04 CHECK THE RESULT

The Transaction Details screen shows “Refund was successful”. The refund is recorded as a separate transaction with a negative Total Amount, and the original appears under Related Transactions.

A successful refund request does not mean the funds are immediately available to the customer. VN8

After a void, find the transaction again and check its Status. VN8

VN21

GOOD TO KNOW

Check the receipt number and amount before you confirm. If you are unsure which action applies, contact Westpac QuickStream support before you proceed.

6

Export transactions

Generate a transaction report using your chosen criteria.

01 OPEN EXPORT TRANSACTION REPORTS

Select Transactions and Reports > Find Transactions > Export Transaction Reports.

02 CHOOSE CRITERIA

Select the business, date, transaction status and order type.

03 GENERATE

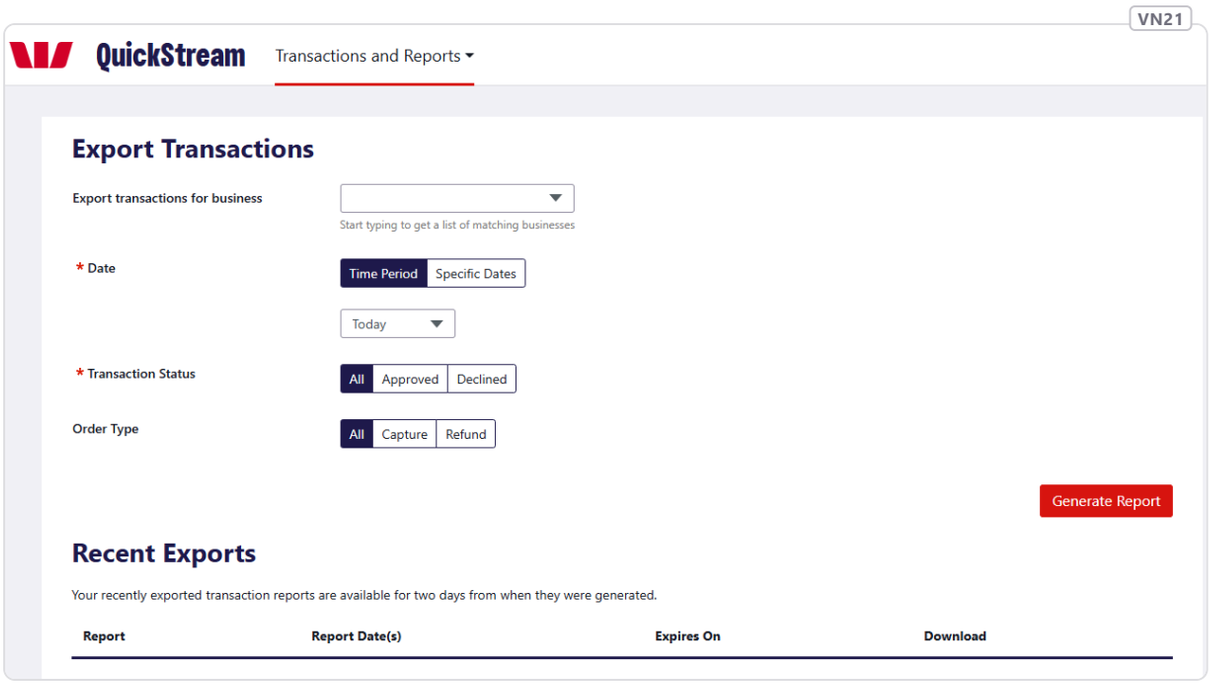

Select Generate Report.

04 DOWNLOAD

When available, use Recent Exports to download the report.

GOOD TO KNOW

Recently exported transaction reports are available for two days from when they were generated.

7

View daily settlements

View settlement information for a selected day.

01 OPEN DAILY SETTLEMENT

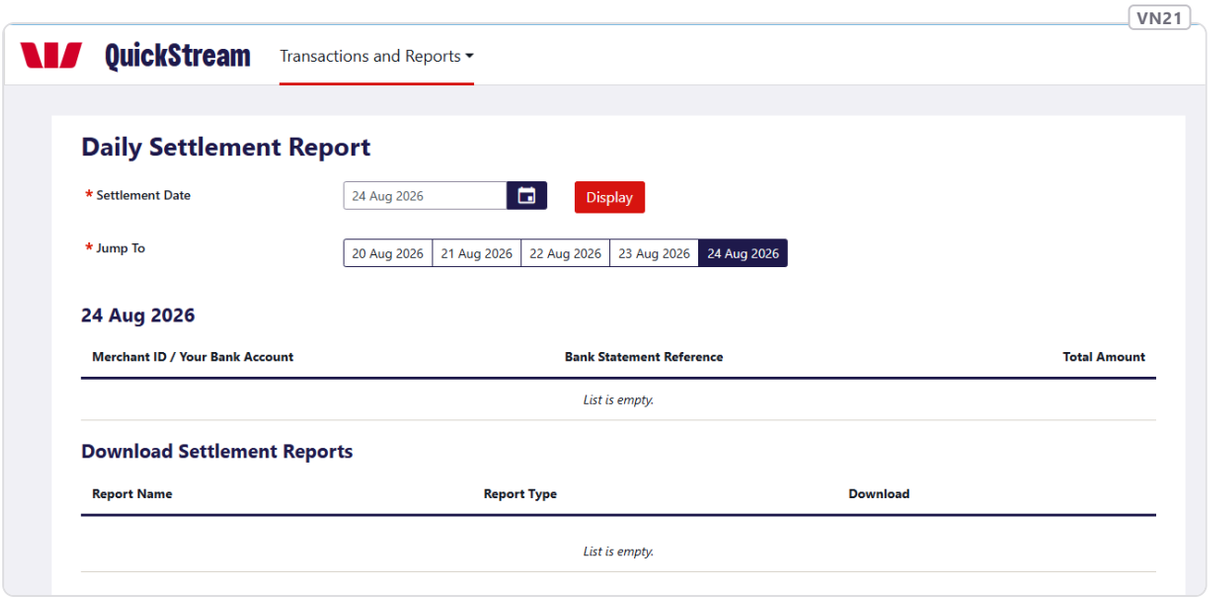

Select Transactions and Reports > Reports > Daily Settlement.

02 CHOOSE A DATE

Enter a settlement date and select Display, or use a Jump To date.

03 REVIEW OR DOWNLOAD

Review the settlement information and download any available report.

8

View weekly settlements

Review daily settlements across a selected week.

01 OPEN WEEKLY SETTLEMENT

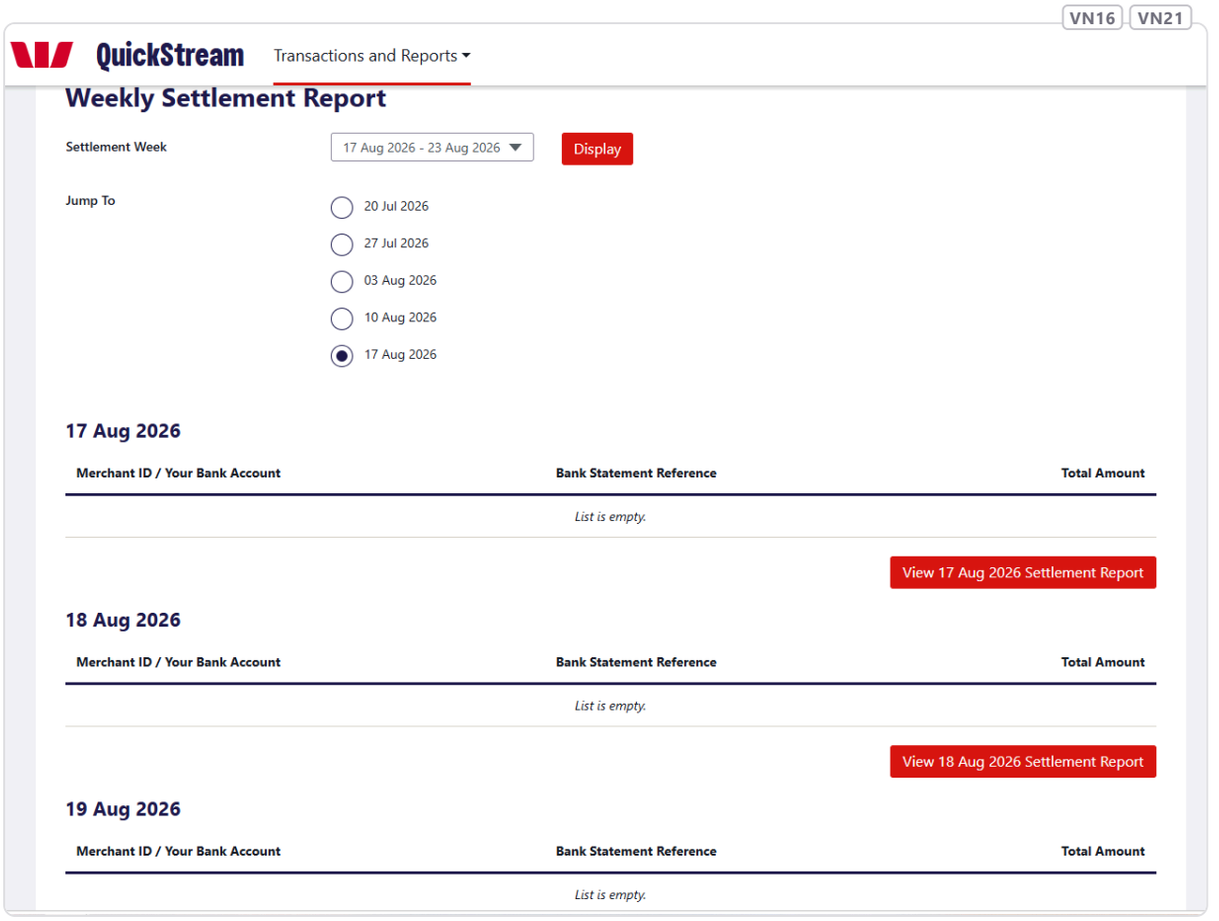

Select Transactions and Reports > Reports > Weekly Settlement.

02 CHOOSE THE WEEK

Select a settlement week and select Display, or use Jump To.

03 OPEN A DAY

Select the View [date] Settlement Report button for the day you need.

9

View facility reports

Find and download facility reports.

01 OPEN FACILITY REPORTS

Select Transactions and Reports > Reports > Facility Reports.

02 SET CRITERIA

Choose the report type and date. Add a business or report name if needed.

03 VIEW

Select View Reports.

04 DOWNLOAD

Use the Download column for the report you need.
